

**AL-6000-STG Security Tour Guard** Reader is designed for the harshest environment. the metal body and molded rubber shell which protect the electric against damage and secure the collected data .are the key points to **AL-STG** readers extreme durability with special waterproof pad and adhesive .the reader is so waterproof that it even can work under water. Furthermore. over 6,000 reads are able to be stored the next download data.

The **AL-6000-STG Security Tour Guard** Reader works with the popular RFID tag. With a simple non-contact swipe, you can access information from tag, and then download patrol data to our intellectualized management software with a USB port cable. The information reports can demonstrate the guards patrolling activities.

## Features

- ★ Alloy body, Molded Rubber Shell, Super Durability
- ★ Non-Contacting Reader
- ★ Completely Water Proof
- ★ Sabotage absorbent, resistant to electrical shock
- ★ USB cable communications, high download speed
- ★ Super Storage Capacity 4MB Flash, 60,000 Records
- ★ Read RFID Tag
- ★ Easy Maintenance
- ★ Reading Distance < 5cm
- ★ Brilliant Exterior Design, Easy operation
- ★ Real time Internal Clock
- ★ Low Power consumption and long battery life, 2,70,000 continuous reads

## Technical

- ★ Physical: Metal body, molded rubber shell
- ★ Working Frequency: 125KHz
- ★ Operating Humidity: 10% to 98%
- ★ Operating Temperature: -45° to 85°
- ★ Memory: 4 KB Flash ROM, 60,000 Pieces Records
- ★ Battery: 3.0 Volt Lithium Battery / Rechargeable Battery avail
- ★ Battery Life: 2,70,000 Continuous Reads (Appro.)
- ★ Signal Card Detection: Auto Induction Card Reading
- ★ Card Reading Distance: 3cm~5cm
- ★ Communication: Use USB Cable, 57600BPS, 4000 Records Per Minitue
- ★ Dimensions: 130mm X 40mm X 30mm
- ★ Weight: 196 Grams
